### Fast Facts

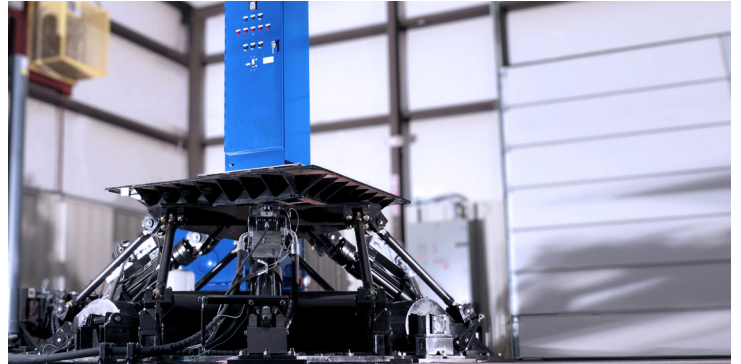

Did you know about a fifth of the country's electricity comes from nuclear power each year? Here are five fast facts to get you up to speed:

1. Nuclear power plants produced 790 billion kilowatt hours of electricity in 2020.
2. Nuclear power is the largest source of clean energy in the United States.
3. Nuclear is one of the most reliable U.S. energy sources.
4. 93 reactors currently operate in 28 U.S. states.
5. Nuclear fuel is extremely energy dense.

### Did You Know?

Nutherm has a state-of-the-art seismic facility at the main manufacturing and testing facility located in Mt. Vernon, IL. The facility employs a digitally controlled triaxial seismic table with the capacity to test full-size assemblies as well as small components and sub-assemblies. All tests are conducted under Nutherm's 10 CFR 50 Appendix B and NQA-1 quality program and will be documented in detailed test reports in accordance with IEEE 344 and customer's specifications.

### Nutherm Happenings

Nutherm kicked off the 4th of July weekend with a family BBQ! Perfect weather for outdoor games, food, and lots of fun! We hope you enjoyed the holiday weekend with your friends and family, too.
